Summary

Senior computer science student and Tuwaiq Academy alumnus focusing on applied AI Engineering, MLOps and data science. Experienced in building end-to-end solutions built with python, data science, machine learning, deep learning, LLMs, RAG, generative AI, and agentic workflows. Completed several bootcamps and courses such as Building and developing AI models bootcamp as well as Building transformer-based NLP applications course, all of which enabled me to have a proven track record in building scalable, production-ready systems that turn raw data into actionable insights and real-world impact.

Education

Building and Developing AI Models Bootcamp (200 hours), <i>Tuwaiq Academy</i> Built a strong foundation in data science, machine learning, computer vision, deep learning, NLP, LLMs and agentic AI by covering data handling and machine learning applications in computer vision and NLP using TensorFlow, PyTorch, and Hugging Face Transformers.	06/2026 – Present Riyadh, Saudi Arabia
Bachelor’s degree, Computer Science, <i>Imam Mohammad bin Saud Islamic University</i> - Built a strong foundation in software engineering, machine learning, and artificial intelligence, applied directly to deployed projects. Media & Design Lead at the Student Advisory Council and volunteer at Tuwaiq Club, Google Developers Students Club and Information Security Club.	08/2021 – Present Riyadh, Saudi Arabia

Skills

- Soft Skills:** Leadership | Project Management | Teamwork | Communication Skills | Problem Solving
- Technical Skills:** Data Science | PySpark | Machine Learning | Deep Learning | Computer Vision | MLOps | AutoML | Natural Language Processing (NLP) | RAG | Prompt Engineering | Generative AI | Transformers | Agentic Workflows | AI-Native Engineering | Python | CNNs | RNNs | LLMs | CUDA | Reinforcement Learning | LangChain | LangGraph | FastAPI | RestAPI | PyTorch | TensorFlow | SQL | Java | Spring Boot | Maven | Next.js | React | JavaScript | TypeScript | Docker | MongoDB | PostgreSQL | MySQL | Modal | Cloudflare Framework | GitHub | Power BI | Microsoft Excel

Projects

- Namtheg - Agentic AutoML Platform** 🔗
Developed an end-to-end **agentic automated machine learning** pipeline leveraging **Python, LangChain, FastAPI, Next.js, Modal, React** and **TypeScript**; built a full **MLOps stack** enabling users to upload raw datasets, train custom models, and deploy production-ready cloud APIs via Modal.
- Nusuk - Agentic Elective Courses Recommender** 🔗
Designed an **agentic** recommendation system with a full data pipeline which updates automatically and parses PDF/text academic transcripts and maps historical grade distributions, therefore increasing recommendation alignment based on user-specific academic history.
- 3ajib - AI Powered Experience Intelligence** 🔗
Developed an **AI-powered** tourism analytics platform for the PwC Empowerthon, securing 4th place out of 11 teams. Integrated a bilingual AI demo, ROI calculator, and analytics dashboard using **React, TypeScript, Supabase** and **JavaScript**.
- N-Queens CSP** 🔗
Implemented and compared **Backtracking, Forward Checking**, and **Maintaining Arc Consistency (MAC)** algorithms with **Java, Spring Boot** and **Maven** to solve complex Constraint Satisfaction Problems (CSPs).

Leadership & Experience

- | | |
|--|-------------------|
| Media and Design Lead, <i>Student Advisory Council</i> <ul style="list-style-type: none">Managed team efforts by leading meetings, assigning tasks, reviewing performance and setting goals. | 09/2025 – Present |
| Part Time Zone Manager, <i>THA Staffing</i> <ul style="list-style-type: none">Supervised teams of up to 25 members in several critical and prestigious events and conferences for multiple government and private entities. | 01/2026 – 05/2026 |
| Part Time Team Supervisor, <i>Webook</i> <ul style="list-style-type: none">Supervised teams of up to 30 members during high-traffic events and conferences. | 10/2024 – 11/2025 |
